- Sharp Utility Knife
- Long Flat Surface
- Straight Edge
- Level
- Painters Tape
- Tape Measure
- Reusable Wallpaper
- Garbage Bag or Can
- Chalkline
-
-
-
-
-

5 STEPS:

1. Mark the wall with tape where you are going to start the line. I like to visually see the spacing to make sure that I like my design.
2. Measure the wall vertically to make sure you have the exact spacing before you pull out the chalk line.
3. Cut it in half using a chalk line and scissors after measuring and marking it across the full length.
4. Apply a chalk line on the wall to guarantee a horizontal straight line across the length of the wall.
5. Use a 12-inch level to make the marks you need without the bulk of a larger level.

TIMEFRAME:

VARIABLES- ONE WALL 2.5 HOURS

NOTES:
